Personal Profile

Computer Science undergraduate who has built a Python blockchain, a CV website and a hackathon football booking app. Experienced in Python, JavaScript and Node.js, with coursework in algorithms, data structures, cybersecurity and artificial intelligence. Seeking a software engineering placement to apply these skills and learn within a real-world development team.

Skills

- **Technical:** Python, JavaScript, Node.js, HTML & CSS, SQL, version control, hashing and consensus mechanisms
- **Communication:** Presented to 100+ students and liaised with healthcare professionals on prescription queries
- **Project management:** Led an IT project from planning through to delivery, coordinating a team
- **Attention to detail:** Followed strict compliance procedures in pharmacy roles, where accuracy is critical

Projects

Blockchain Implementation | Python **July 2026**

- Built a blockchain from scratch that registers and validates transactions submitted from multiple sources.
- Implemented proof-of-work to secure block creation and prevent tampering with the chain.
- Applied cryptographic hashing to link blocks and preserve the integrity of the chain.
- Developed a basic consensus mechanism so all participants agree on one valid chain.
- **GitHub:** github.com/rudrrag/python_blockchain_project

CV Website | HTML, CSS, JavaScript **Jan 2026**

- Designed and built a personal CV website using HTML, CSS and JavaScript to present skills online.
- Structured pages with semantic HTML and styled them with CSS for a readable, consistent layout.
- Used JavaScript to add interactive features that improve the user experience of the site.
- **GitHub:** github.com/rudrrag/[repository-name]

Neural Network from Scratch | Python **August 2026 - Present**

- Building a neural network from first principles in Python without high-level machine learning frameworks.
- Implementing forward propagation, backpropagation and gradient-based learning to understand how networks train.

Hackathons

Aston University Hackathon | HTML, CSS, JavaScript, Node.js, Google Gemini API **Feb 2026**

- Collaborated in a team to build a football booking website within 24 hours.
- Generated project ideas and helped choose the programming languages and technologies for the build.
- Planned the application architecture, defining how the front end, back end and Gemini API connect.

Certifications

- Claude 101: Anthropic

Experience

Bruton Pharmacy | Pharmacy Counter Assistant, Wolverhampton **Apr 2026 - Jul 2026**

- Assisted with prescription dispensing and stock organisation using inventory software, reducing medication errors.
- Answered patient queries at the counter using POS and patient-management systems, improving patient satisfaction.

Larvic Pharmacy | Pharmacy Counter Assistant, Walsall **Jul 2024 - Jan 2025**

- Clarified prescription details with healthcare professionals as part of a team of 6, preventing dispensing errors.
- Followed SOPs and used inventory-management software to meet safety regulations, achieving zero audit findings.

Health & Beyond | Business Intelligence, Wolverhampton **Jun 2022**

- Wrote Python scripts to register patient data and streamlined lookup tables, reducing clinicians' search time.

Education

Aston University | BSc, Computer Science **Sep 2025 - Present**

- **Coursework:** Programming, Data Structures, Cybersecurity, Artificial Intelligence, Algorithms
- Completed solo and group projects applying Python, algorithms and system design.

Wood Green Academy | A Levels **Jun 2025**

- **Results:** Computer Science (B), English Language (C), OCR Cambridge Technical Certificate in IT (Distinction)

Wood Green Academy | GCSEs **Jun 2023**

- **Results:** English Literature (7), English Language (6), Maths (6), History (6), French (5), Combined Science (5-5), Psychology (4), BTEC Level 3 IT (Distinction, Distinction, Merit)
